

HIGHAM FARM

At Higham Farm, we are proud to partner with Warrendale Wagyu, the UK's leading producer of British Wagyu beef.

Founded in Yorkshire, Warrendale collaborates with a network of over 800 UK farmers to produce its signature F1 Wagyu.

By crossing world-class genetics with traditional British dairy cattle, they create a beef that is famously marbled and buttery in texture. For our guests, this means a steak that is high-quality, sustainable, and truly exceptional in flavour.
